5. **Public/board Comments:**
6. **Next Meeting Board Meeting: December 17, 2025 at 7PM**

(m) - motion, (r) - receive and file, (i) - information, (d) - discussion

Additional Information Supplied by Contractors

JKB

How wide and thick the ramp is and what psi it is rated for? – The ramp will be 5' wide, 5" thick. 4,000 psi concrete

What is the timeline for each part of the project? When would you be able to start inside and then outside? – we can start the inside probably 6 weeks after contract. I would like to start right when the cabinets are available to install so we won't have to take up the space for longer than needed.

If they did not provide specifics for materials used for the interior spaces, could they provide specific base material that the estimate is based upon and/or a more itemized estimate? – yes, I can provide samples of what has been quoted. Please let me know if you want them.

Can you provide any references and examples of recent work? – city of holland train station remodel. Contact, Matt Vandyken. Email: m.vandyken@cityofholland.com. Light house autism center. Complete remodel of the old family video off of cotton wood in Jenison. Contact: Eric Shaffer. Email: eshaffer@lighthouseaba.com

GRCC, project consisted of all new ACT ceiling, drywall repair, and electrical updates. Contact, Abbot Kastanek. Email: akastanek@grcc.com

And last, you didn't mention landscaping/cleanup after ramp installation. With your off the front design, I wasn't sure how much of the landscaping would be disturbed but would that be included or if not, how much extra would that be? – concrete contractor is responsible for the removing what is in their way to put the ramp in. we will leave what we do not have to remove.
